## 1. Product description:

MVN38807, also known as Y-1, is neuraminidase (NA) inhibitor used in preparation of drugs for resisting H1N1 influenza virus. Y-1 exerts the best inhibition activity (IC<sub>50</sub> = 0.21 μM) against NA, which is better than oseltamivir carboxylate (OSC) (IC<sub>50</sub> = 3.04 μM) and lead AN-329/10738021 (IC<sub>50</sub> = 1.92 μM). This product has no formal name at the moment. For the convenience of communication, a temporary code name was therefore proposed according to MedKoo Chemical Nomenclature (see web page: <https://www.medkoo.com/page/naming>).

## 2. CoA, QC data, SDS, and handling instruction

Note: copies of analytical spectra may not be available if the product is being supplied by MedKoo partners. Whether the product was made by MedKoo or provided by its partners, the quality is 100% guaranteed.
